Professional Summary

B. Tech Computer Science candidate (2026) with internship experience building **Python-based ML prototypes, reusable analysis scripts, dashboards, and data workflows**. Delivered a classification model with **87% accuracy** and analyzed **10,000+ records** to identify a **20% seasonal spike** supporting planning decisions. Strong foundation in **Python, SQL, Git, debugging/troubleshooting, documentation, iterative improvements**, with exposure to **AI/ML and GenAI/RAG fundamentals**. Quick learner of new tools and concepts. Targeting **Junior R&D Engineer (GenAI/ML)** roles to build **automation tools, prototypes, and AI/ML-driven utilities** that improve game testing and QC workflows, reduce manual effort, and improve test efficiency.

Technical Skills

Programming / Scripting: Python, SQL.
Automation / Tooling: test automation, pytest, CI/CD (GitHub Actions), scripting, prototyping, integration, utilities, workflow automation, debugging, troubleshooting, documentation, maintainability
AI/ML: Pandas, NumPy, scikit-learn, model training & evaluation, feature engineering, EDA, statistical analysis, CNN/RNN basics, GenAI fundamentals, RAG fundamentals
Visualization / Reporting: Tableau, Power BI, Excel, Matplotlib, Seaborn, Plotly
Tools / Dev: Git, Jupyter Notebook, MySQL, Flask
Quality / Lifecycle: automated testing, QA/QC automation, SDLC basics, testing lifecycle basics, manual testing fundamentals

Experience

Data Science Intern (Python + ML Prototyping) | Unified Mentor Private Limited Jun 2025 - Dec 2025
Remote, Part-time

- Built repeatable Python workflows to clean and validate a **~5,000-row dataset** (missing values, outliers), improving readiness for downstream modeling.
- Trained and benchmarked classification models using **scikit-learn**, achieving **87% accuracy** on the selected approach.
- Created **3 dashboards** to communicate outputs and insights to internal users; collaborated with them and incorporated feedback in iterative updates.
- Version-controlled notebooks/scripts with **Git** and documented steps/assumptions to support reuse and knowledge continuity.

Data Science Intern (SQL + Analytics) | Internshala Jun 2024 - Aug 2024
Remote, Part-time

- Analyzed **10,000+** sales/customer records using **SQL + Python**, identifying a **20% Q4 seasonal spike** to support planning decisions.
- Built **4 Tableau dashboards** for KPI monitoring and trend analysis, enabling repeatable reporting workflows.
- Supported analysis for **2 A/B tests** by preparing datasets, comparing results, and summarizing recommendations.

Projects

QC Automation Toolkit | Python, pytest, Pandas, GitHub Actions (CI/CD) Oct 2026

- Built a Python test-automation toolkit running automated data-quality checks (schema, missing values, duplicates, ranges, outliers) with JSON QC reports, reducing manual verification.
- Wrote a **pytest** suite (18 tests) and a **GitHub Actions CI/CD** pipeline that runs tests on every push and publishes QC reports as build artifacts.

Real-Time GPS Tracking System | Flask, Serial Communication, APIs, Folium, Geopy Dec 2024

- Built a real-time dashboard prototype in **Flask**, integrating live GPS coordinates via serial communication and API inputs.
- Implemented mapping/visualization using **Folium** and routing support with **Geopy**; troubleshooted live data-flow issues for stable updates.

Data Analysis Projects | Python, Pandas, Seaborn Mar 2024 - Dec 2025

- Zomato Data Analysis (Mar 2024):** cleaned inconsistent rating/cost fields; performed feature engineering and EDA to surface trends and correlations.
- Airbnb Listings Analysis (Nov 2025):** cleaned data (missing values/outliers) and summarized pricing/room-type/geographic trends through visual analysis.
- Netflix Content Analysis (Dec 2025):** analyzed catalog metadata for content distribution and release-year trends; produced visual summaries (including word cloud).

Education

B. Tech, Computer Science & Engineering (Expected 2026) CGPA: 7.3/10
Dr. J. J. Magdum College of Engineering, Jaysingpur

Certifications & Languages

Tata - GenAI Powered Data Analytics (Jul 2025) | Deloitte - Data Analytics (Jul 2025) | British Airways - Data Science (Jul 2025)
Languages: English | Marathi | Hindi
